

RME CRITICAL UPDATE

ROBERTS MECHANICAL EQUIPMENT COMPANY | "What's in your boiler room?"

April 24, 2007

RE: Schebler Company

We are very excited to announce the addition of UL listed AL29 venting systems as manufactured by Schebler Company. Schebler is an old and reliable company out of Chicago which we have the good fortune to directly represent.

In addition to this new ANSI Category IV product, Schebler also manufactures ANSI category III positive pressure venting with some very distinctive advantages. Systems may come with 1" or air space to 4" of insulation. They also make a UL listed grease duct system.

When it comes to venting, Roberts Mechanical Equipment are your local experts. Directly representing companies such as Schebler combined with Exhausto and Kentube, we have the ability and resources to calculate and guarantee a venting system design with optimum first cost results for absolutely any manufacturer's boiler, water heater, fireplace, or clothes dryer. We know the codes, we know the issues, and we know how to solve any venting challenge.

To learn more about this product, simply visit: www.robtsmech.com and click on products or Venting on Demand. There you will see a Schebler logo. Click on the logo and gain all the information you need to purchase, design, or install the Schebler product! You may also email us at info@robtsmech.com or call our Cleveland office at 216.587.0005.

Our support staff can also assist you with components or parts for Schebler, Exhausto, or Kentube. Simply contact our parts expert (Christina.robts@robtsmech.com) or one of our factory trained and certified in house tech's through our solutions director (doug.bolas@robtsmech.com).
