

# About Us

Division means Divided! Instead, we are a family owned business who will work hard to gain your respect and loyalty. Each product on this line card was hand chosen because of its quality, serviceability, and support. Because it's 'our' name on the sign, each product and every employee is a reflection on our family and we will insure that it's a good reflection!

In the last 5 years our firm has experienced incredible growth. Most recently winning the Case Western Reserve Weatherhead 100 award (5th place). In addition, we've listened to what our contractors need and took the necessary steps to complete the "Drug Free Workplace" program and State Ohio EDGE certification. We also received RSB/FBE certification from the City of Cleveland.

We have the largest selection of high efficiency products unmatched by any representative in our area. Most of our products are American made and many offer a unique and uncommon approach to saving energy. Our consulting staff is trained to look at your entire project from the boilers to the bathroom exhaust.

We are dedicated to the technical demands of boilers and the most innovative combustion equipment. We directly employ a full service staff to support everything we sell. All of our experienced technicians are factory trained and certified by our manufacturers. We also provide a project manager to consult with your team providing them the smoothest and least problematic installations.

During the last few years, our growth has put a larger demand on our parts and warranty services. We are staffed with an inside sales team to provide your firm with the parts they need, when they need it. RME exclusively represents OEM parts for some of the world's largest manufacturers such as Gordon Piatt, Webster, Beckett, Hydrotherm, RBI, HB Smith, Rapid, Exhausto and Columbia. We carry aftermarket parts and gaskets for many other famous manufacturer's as well. We handle a full line of accessories to complete the project (expansion tanks, air separators, venting, and much more)!

Our staff stands ready to service your every need from our new corporate office and warehouse located in Bedford Heights, Ohio.

## What a Rep Must Give you!

We are not your typical representative. We represent products based on quality, serviceability, the best possible warranty and longevity.

More important we know not every type of equipment is right for every job. Therefore, we represent all the various types of boilers and air side products so we can give you a true and accurate design solution.

Are we mechanical contractors? NO! Our staff is dedicated to the support and warranty service of our equipment. Are we a design firm? NO! Our design services, equipment, and support are offered to our loyal contractors and engineers in the Northern Ohio Territory. Our job is simple. Help design the best possible project, with the most complete and accurate documentation and be sure our engineers/contractors are protected as much as possible. Most important, every recommendation is based on integrity and honesty! Our goals are: no change orders, proper application, and that every contractor and engineer in our territory is educated on all the various options available to them using today's latest and greatest technologies!

RME will be the partner you can trust to provide you a project that never comes back to haunt you! If you aren't already working with us, give us a try and you will see we are the most experienced and technically sound rep in the area! We guarantee it!
